THE YEAR AT A GLANCE

The year. One unmistakable feed.

Instagram only. Four feed pillars and a Stories overlay. Built around the four content pillars that earn a weekly slot every month: Entrepreneur, Blue Rhino Way, Dad Content, and Database Mining. Every post passes The Filter before it goes up.

THE FILTER

Could this have been posted by any other mortgage broker in Toronto? If yes, it doesn't go up.

The Blue Rhino Way • Monthly Series

Brand-building post. Story-driven. The cumulative effect by December: a brand someone knows without needing a mission statement.

June	"Why I named it Blue Rhino. And what it means for how we do mortgages."
July	"What Blue Rhino believes about self-employed lending. It's not what the banks believe."
August	"I reviewed every client file last month. Here's what I found." (Database mining story)
September	"The deal that almost didn't close. And what it taught me about this business."
October	"What being a dad taught me about what a mortgage actually means."
November	"Blue Rhino's year. The files I'm proudest of, and why."
December	"What I'm building for 2027. The Blue Rhino standard, raised."

THE DIFFERENTIATOR

The POP Framework. Monthly.

Database mining is the through-line that defines the Blue Rhino feed. Scott runs his book proactively, finding pain, money, and protection inside existing client files. The content reflects that reality.

THE POP FRAMEWORK

Pain points found and solved. **Opportunities** identified to save clients money. **Protection** delivered before clients know they need it.

Database Mining Content Calendar
