

Scott Pattinson.

Mortgage Agent · Premiere Mortgage Centre
Toronto · GTA · Twice-Monthly Email

One voice. Where depth lives.

CAMPAIGN PHILOSOPHY

IG drives awareness. Email drives depth.

Scott's email is where depth lives. Instagram drives awareness and brand equity. Email drives relationship and trust. The person who subscribed did so because they want more than a caption. They want the full breakdown, the honest take, the entrepreneur perspective with room to breathe.

This is also where database mining becomes a retention engine. The emails that say "I reviewed your file and found something" aren't generic. They're proof that Blue Rhino is always working, even when the client isn't thinking about their mortgage.

The same voice as IG. With more space.

Cadence & Audience

FREQUENCY	DB MINING	VOICE	CTA
Twice Monthly	Monthly Anchor	Entrepreneur + Dad	One per email Phone or Email

Audience: Past clients, Toronto homeowners, self-employed and entrepreneur prospects, email subscribers from IG.

From: Scott Pattinson, Blue Rhino Mortgages

CTA rotation: Phone (416.220.0231) or email (scott@bluerhinomortgages.com). One per email, never both.

THE FORMAT

Five parts. Every time.

The same skeleton on every email. First-person, grounded, expert. Same voice as IG but longer form. Never templated even though the structure is consistent.

01 · Subject	Direct, human, never clickbait. Scott's voice should come through even in the subject. No emoji in subject lines. Under 50 characters when possible.
02 · Opening	Personal hook, entrepreneur angle, or dad moment. One paragraph that earns the scroll. No "Hi {{first_name}}, hope this finds you well."
03 · Body	The depth. Full breakdown, case study, or Q&A from DMs. The reason this email exists. The thing IG didn't have space to deliver.
04 · CTA	One action. Phone or email, rotated across the campaign. Never both in the same send.
05 · Sign-off	"— Scott" followed by the Blue Rhino footer: company line, contact line. Nothing more.

Subject Line Rules

- Direct and human. Not clickbait. Not a banner ad.
- Scott's voice comes through in the subject itself.
- No emoji in subject lines.
- Under 50 characters when possible.

Sample Subject Lines

- "I check my clients' files every month"
- "Your renewal is 13 months away. I know."
- "Your HELOC is costing you more than your mortgage"
- "Your parents co-signed. You might not need them anymore."

THE RETENTION ENGINE

Half the campaign. POP framework.

Half the campaign is built around Scott's database mining strategy. Database mining isn't a one-off mention. It's a consistent through-line that proves Blue Rhino is always working.

THE POP FRAMEWORK

Pain points found and solved. Opportunities identified to save clients money. Protection delivered before clients know they need it.

Database Mining Email Calendar

MONTH	STRATEGY	POP CATEGORY
• June	Variable rate arbitrage	Opportunity \$\$
• July	Early renewal (13-month)	Protection
• August	Full file review aggregate	All
• September	HELOC consolidation	Pain / Opportunity
• October	Guarantor removal	Pain removal
• November	Mismatched renewals + amortization	Protection / Pain
• December	Annual full review	All

Why This Is the Retention Engine

The standard broker rhythm contacts past clients twice in a five-year cycle. At signing, and at renewal. Scott's database mining emails create additional proactive touchpoints across 2026, each one a demonstration of value. The "I reviewed your file and found something" narrative is what keeps clients on the list, opening the next email, forwarding the one after that.

Database mining emails are positioned as client care and proactive management. They are never sales tactics. The tone difference matters.

Coordination With IG

Email delivers depth. IG drives awareness. Same voice, different surfaces. Database mining emails reference but never duplicate IG carousel content from the same month. BoC-triggered bonus emails within 48 hours through the entrepreneur lens, Toronto framing. Email list growth driven by IG bio link, Stories CTA, and DM conversations.

WHAT BLUE RHINO EMAIL NEVER DOES

The guardrails. Strict.

The list of things these emails refuse to do is as important as what they do.

- Sound like a bank newsletter or corporate brokerage.
- Use generic marketing phrases ("Let's chat!", "Don't hesitate to reach out").
- Include multiple CTAs in a single email.
- Feel templated or automated.
- Reference platforms Scott doesn't use (Facebook, LinkedIn, Google).
- Lose the entrepreneur and dad identity. Every email should feel like Scott.
- Treat database mining as a sales tactic. It's positioned as client care and proactive management.
- Use emoji in subject lines.
- Duplicate IG carousel content from the same month.
- Include both a phone CTA and email CTA in the same send.

The Standard

Every email Scott sends should feel like he sat down and wrote it for this audience, this week, this idea. The structure stays consistent. The content never does. Templated emails get unsubscribed. Specific emails get forwarded.

The email Toronto business owners forward to their accountant.

Hashtag Strategy (For Reference)

Email is not hashtagged. IG hashtags only. Listed here so the IG bio CTA and Stories swipe-up references in emails point to the same brand vocabulary.

Always: #BlueRhinoMortgages and #ChoosePremiere

One voice. Where depth lives.

Same voice as IG. More space. The retention engine that proves Blue Rhino is always working. Toronto. 2026. Blue Rhino.
